TRADE LIST

—OF—

RARE FLORIDA FLOWERS

—AND—

←+FRUITS+→

1893-'94.

We take pleasure in again handing you our Trade List of Rare Florida Flowers and Fruits, soliciting a share of your kind patronage.

Express Rates Cut.—The recent reduction in Express rates to all points by the leading Express Companies, together with our low prices for gilt edge stock, now enables us to lay down our goods to you at prices as low as can be done by any concern in the country.

Shipping.—We are situated within easy distance of three lines of railway, which afford us superior facilities for quickest transit and lowest rates. We prefer our customers to give explicit shipping directions, but in the absence of such, we will forward by the cheapest and most expeditious route, and upon delivery to transportation company our responsibility ceases. All claims, to receive attention, must be made within ten days after receipt of goods.

Packing.—The greatest possible care is employed in executing orders, and goods are packed in such manner as to insure safe arrival.

Terms.—Cash in all cases except from well-known correspondents. Our prices are made close, and we can take no risk of slow collections.

At prices named per single plant, of all mail sizes, we send by mail postpaid. The sizes offered at a higher price, also Spanish Dagger Canes, are too large for mailing, and will be sent by express at buyer's expense. Price per 100 and per 1,000 is f. o. b. freight or express office.

Remittances.—Should be made by P. O. Money Order, New York draft, check on Bank of Pasco County, Dade City; Express Money Order or Registered Letter.

References.—Those of the trade yet unacquainted with us, may obtain particulars as to our reliability, etc., by addressing Mr. John Lewis Childs, Floral Park, N. Y., or Bank of Pasco County, Dade City, Florida.

Address,

PIKE & ELLSWORTH,
Jessamine, Fla., U. S. A.

NOVELTIES AND SPECIALTIES.

"The Coming Hedge Plant."

(*Citrus Trifoliata*. Japan's New Hardy Orange.)

This extremely curious and beautiful orange has proved perfectly hardy—without any protection—as far North as New York, Pennsylvania and Illinois, and by competent judges is believed to be perfectly hardy in every portion of the United States. In the parks of New York and Philadelphia, and in the government grounds at Washington, it has been growing unprotected for years, where it annually blooms and fruits profusely. It has trifoliate or clover-shaped leaves, larger and finer blooms than any other sort, and produced over a much longer season, frequently blooming two or three times during the summer. Plant dwarf, forming a beautiful shrub from four to twelve feet high. Can be grown in a pot or tub, if desired, and as a stock on which to bud or graft, and dwarf the larger growing varieties it is all that can be desired. Prof. W. F. Massey, of the North Carolina College of Agriculture, has THOROUGHLY tested it, and states that he has no doubt that in it the hedge plant of all others for all parts of the country has at last been found, and that its adoption can only be a question of time.

Strong mailing plants, 10 to 15 inches, 15c. each, 50c. per dozen, \$3.00 per 100, \$25.00 per 1,000. Large, for express, 25c. each, \$1.00 per dozen, \$8.00 per 100.

Australian Silk Oak, or *Grevillea Robusta*.

A splendid ferny-leaved, evergreen plant, which makes a magnificent pot plant for all sorts of decorative purposes. In conjunction with Palms and Ferns, or in an ordinary collection of house plants, it is at once striking and graceful. It will resist drought to a remarkable degree, and is, therefore, well adapted to withstand the dust and heat of living rooms, and as a centre plant for vases. A superb pot plant for piazza decoration during summer. Flowers golden yellow. Price of fine plants, from 2 inch pots, 15c. each, 50c. per dozen, \$4.00 per 100, \$35.00 per 1,000.

Spanish Dagger, or *Yucca Aloifolia*.

One of the most imposing and tropical-appearing plants with which we are acquainted, and it will stand any amount of neglect except too severe freezing. It is always ornamental from its small stage until it becomes an imposing specimen. Leaves very dark green, stiff and pointed, forming a fine head. Begins blooming while quite small, producing an immense head of creamy, bell-shaped flowers, followed by Banana-like fruits. As a decorative plant for florists it cannot be surpassed, being fully as desirable as the finest Palms, and even more striking in appearance. We can furnish the canes or trunks in lengths from one to three feet. These are old plants as large round as a man's wrist, or larger, and stripped of their leaves. Every one of them will root at once on being potted, no matter if they have lain dry for months, and put out a fine head of leaves, soon forming a grand specimen which it would require years to produce from a small plant. Nice little plants, 20c. each, 50c. per dozen, \$4.00 per 100. Canes or trunks in lengths from one to three feet (by express) at 20c. per foot. When ordering state in what lengths wanted cut.

Hardy Tuberous-Rooted *Ipomœa*.

This magnificent tuberous-rooted *Ipomœa* (*Ipomœa Pandurata*), of which we are the introducers, is perfectly hardy, standing the winters of Massachusetts and Wisconsin without protection. No florist who issues a catalogue should fail to include this grand tuber among the novelties, for nothing can be finer or more desirable. By ordering from us you will get fresh, sound tubers directly from the ground, which will bear no resemblance to the shriveled and decayed stock which has been kept at the North for months. Fine flowering tubers 15c. each, \$3.00 per 100, \$18.00 per 1,000.

Zamia Integrifolia, or Coontie.

This strikingly beautiful and interesting Cycad is something between a Palm and a Fern, but is neither, and is of extreme stateliness and beauty. The leaves are pinnate and Palm-like, but coiled in the bud like Ferns, and like the Sago Palm (*Cycas Revoluta*), retain their beauty for some years. Price, nice dry roots, weighing from 2 to 8 ounces each, 8c. per lb. Splendid pot-grown plants with 2 and 3 leaves, 30c. each, \$2.00 per dozen, \$15.00 per 100; 4 and 5 leaves, 50c. each, \$3.50 per dozen, \$25.00 per 100.

Arundo Donax Variegata.

A magnificent Bamboo-like reed, quickly producing a splendid oriental effect. Shoots up canes from 6 to 10 feet tall, clothed their entire length with long and broad leaves, most beautifully striped with different shades of white and cream color. Perfectly hardy in the latitude of New York City. Plants from 3-inch pots, 20c. each, 75c. per dozen, \$5.00 per 100.

Thalia Divaricata.

A magnificent ornamental foliage plant, highly appreciated in Europe. In general appearance it resembles the Canna, to which it is closely related, but is much more tropical looking. Price, 20c. each, 50c. per dozen, \$4.00 per 100.

New Hardy Hymenocallis, or Spider Lily.

A Spider Lily which can be planted out in gardens all over the North like a Pæony and prove equally hardy is a novelty indeed, and a most valuable and welcome one. Such is the following species, and it is now possible to have clumps of these elegant and charming flowers in the yard with no trouble after once setting them out. They have been subjected to the most rigid tests at the North, and have proved equally as hardy as the old *Narcissus poeticus*. Bulbs planted late in the fall (too late to make any roots before winter set in) came through without any protection whatever, and are now growing vigorously. They bear an abundance of white flowers equally as beautiful and fragrant as the tender species, and the beauty of a clump of them established in a yard or border is better imagined than described. Fine blooming bulbs, 15c. each, 75c. per dozen, \$4.00 per 100, \$20.00 per 1,000.

Bulbs of the Amaryllis Family.

	Doz.	100
CRINUM KIRKII (?)—Fine bulbs, first size, three inches in diameter, 30c. each.....	\$1.75	
Second size, weighing one and one-half pounds and upwards, 50c. each.....	2.25
